RE: KIPP DC: and GTR

To whom it may concern:

GTR Turf provided the turn-key services for the synthetic turf installation at our KIPP DC Douglass campus renovation this summer. We could not be more pleased with the final outcome of this project.

Luc Rochon's team was able to provide all the necessary components of this complex job from design and engineering, to supply of drain base and installation of the Sportexe Powerblade system. His staff was well-versed in all facets of the project and was a pleasure to work with on a daily basis. Of particular note were Dale Lynden and Benoit Laverdure, who not only ensured a high quality finished product, but communicated with us in a clear and concise manner whenever we had questions or required clarifications.

Our students now have a world class facility to play upon -- we could not have anticipated such a seamless process until GTR became involved. We highly recommend them to any and all potential clients going forward.

Sincerely,

To Whom It May Concern:

During July of 2010 Cambridge Youth Soccer hired GTR Turf to do restorative work on our indoor soccer facility, Com Dev Indoor Soccer Park.

I was very impressed with the diligence of the crew who worked for four full days carefully replacing areas of the turf that had been installed incorrectly by another contractor in 2008.

The crew was very meticulous when it came to flagging areas of seam damage on 40,000 square feet of turf.

GTR's crew were very friendly and extremely knowledgeable about the turf and always took time from their work to point out maintenance tips which had never been shown to me previously.

After repairing seam damage the crew then spend almost two days filling the field with a combination of rubber infill and sand.

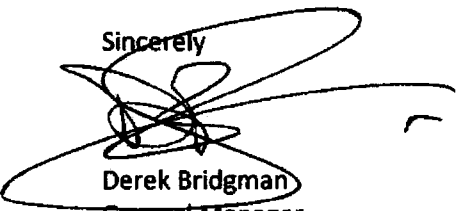

In my opinion the crew went beyond my expectations as they even took the time to clean our dome at the end of the job.

The repairs have made a major difference in our field playability and our user groups have really noticed the positive changes.

I would highly recommend GTR Turf to any facility manager who is looking to make repairs to an indoor or outdoor field or to any group looking to perform a new turf installation.

If you have any questions regarding GTR's work at our facility please feel free to contact me via telephone at (519) 653-8800 or via email at derek@cysoccer.ca

Sincerely

Dear Luc,

I would like to thank you and your Team on an exemplary job that you performed for the installation of the Shaw / Sportex Powerblade at Upper Perkiomen Stadium and Auxiliary fields. We are very pleased with the final product.

GTR provided a professional approach to all aspects of the job and were very co-operative to everyone who approached them whether it related to their part of the project or not.

I would without a doubt highly recommend GTR to any and all for their future needs in the synthetic turf industry.

Sincerely yours,
